

Make IT Happen 2008

How2 make the flicker book from the flicker book sheet

Take the flicker book sheet and carefully cut out each picture.

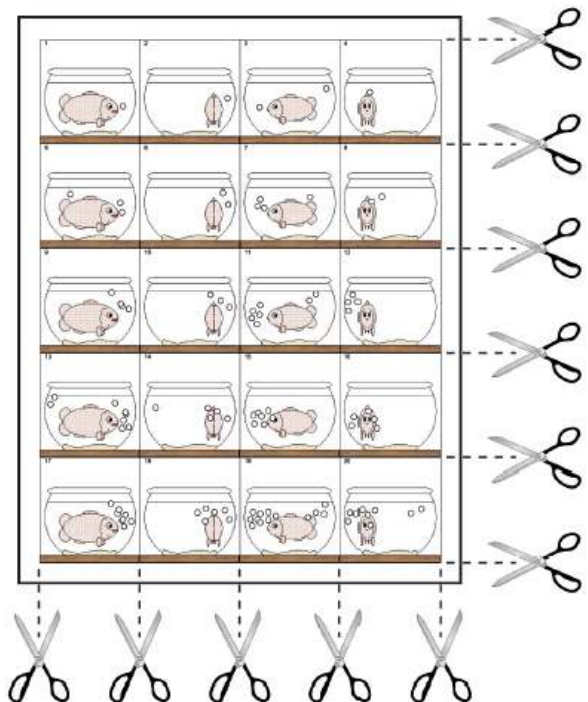

Take care to follow the lines and keep the pictures in order (each one has a number).

①

Remember to take great care when you use scissors.

Each of these pictures is called a 'cell' and each cell shows a step in an animation story.

It's very like the way cartoons are made.

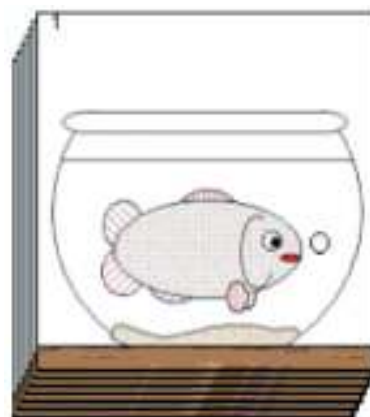

Make sure you have all the cells in order and the same way round.

Hold the top edge firmly, or you could use a clip or a staple – but take care.

②

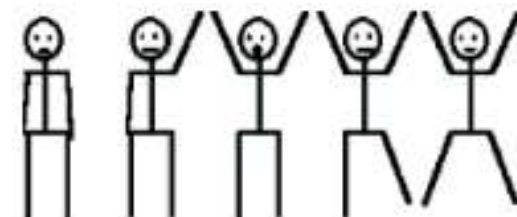

Now flick the pages of the flicker book so you see the first page then the next and the next one quickly after another.

If you turn over the flicker book you can use the blank pages to make your own cell animation.

③

Try a stick character sequence.
